- Scene 4
 - Neutrons are a type of subatomic particle with no charge (they are neutral).
- Scene 5
 - Like protons, neutrons are bound into the atom's nucleus as a result of the strong nuclear force.
- Scene 6
 - Protons and neutrons have approximately the same mass, but they are both much more massive than electrons (approximately 2,000 times as massive as an electron).
- Scene 7
 - The positive charge on a proton is equal in magnitude to the negative charge on an electron.
- Scene 8
 - As a result, a neutral atom must have an equal number of protons and electrons.

Storyblocks

• Electrons are a type of subatomic particle with a negative charge.
