My own Personal Best Trivia

Challenge Part 1:

Find a partner and ask them what their best trivia category would be.

GOSSIP GIRL TRIVIA

3. Which European city do Blair and Chuck get married in?

- A) Paris
- B) Rome
- C) Monte Carlo
- D) New York City

Answer: D) New York City

My own Personal Best Trivia

Challenge Part 2:

Use an **LLM** to create 5 trivia questions with multiple choice answers on the topic and quiz your partner on their topic. If they get the right answer without multiple choice it's 2 points. With multiple choice is 1 point.

Did **AI** get any wrong?

VIBE CODING

Design an app/website that is interactive and looks like an old school boom box. The buttons should be interactive and do different things but each time you click on a button, you get a 7th grade math problem to solve. If you get it right, the boom box lights up and plays a song. You can switch out the "tapes" to do other types of problems (geometry, algebra, etc)

VIBE CODING

The screenshot displays a Vibe Coding workspace interface. On the left, a chat window titled "BoomBox Math Personal Workspace" contains a message from "Base44" describing a project: "Design an app/website that is interactive and looks like an old school boom box. The buttons should be interactive and do different things but each time you click on a button, you get a 7th grade math problem to solve. If you get it right, the boom box lights up and plays a song. You can switch out the 'tapes' to do other types of problems (geometry, algebra, etc)". Below the message are options to "Show less", "11 days ago", and a copy icon.

The main preview area shows a web browser with the URL "math-beats-lab.com is available Get Domain". The browser content displays a game titled "MATH BLASTER 3000" with the subtitle "SOLVE TO GROOVE · 7TH GRADE EDITION". The game interface is styled as a boombox with two speakers, a central cassette deck labeled "ALGEBRA MIX 7TH GRADE MATH - VOL.1", and a control panel with buttons for BASS, REW, PLAY, PAUSE, STOP, FF, EJECT, and TREBLE. A progress bar and a "INSERT TAPE & PRESS" button are also visible. At the bottom of the preview, it says "© MATH BLASTER AUDIO CORP · EST. 2024".

Action Plan to Save Teachers Time in Their Day

This document outlines a strategic action plan designed to help educators maximize their time efficiency, allowing them to focus more on teaching and less on administrative tasks. By implementing these strategies, schools can create a more supportive environment for teachers, ultimately benefiting student learning outcomes.

AI in the Classroom... 1 source · 83d ago

New note 418d ago

Add note

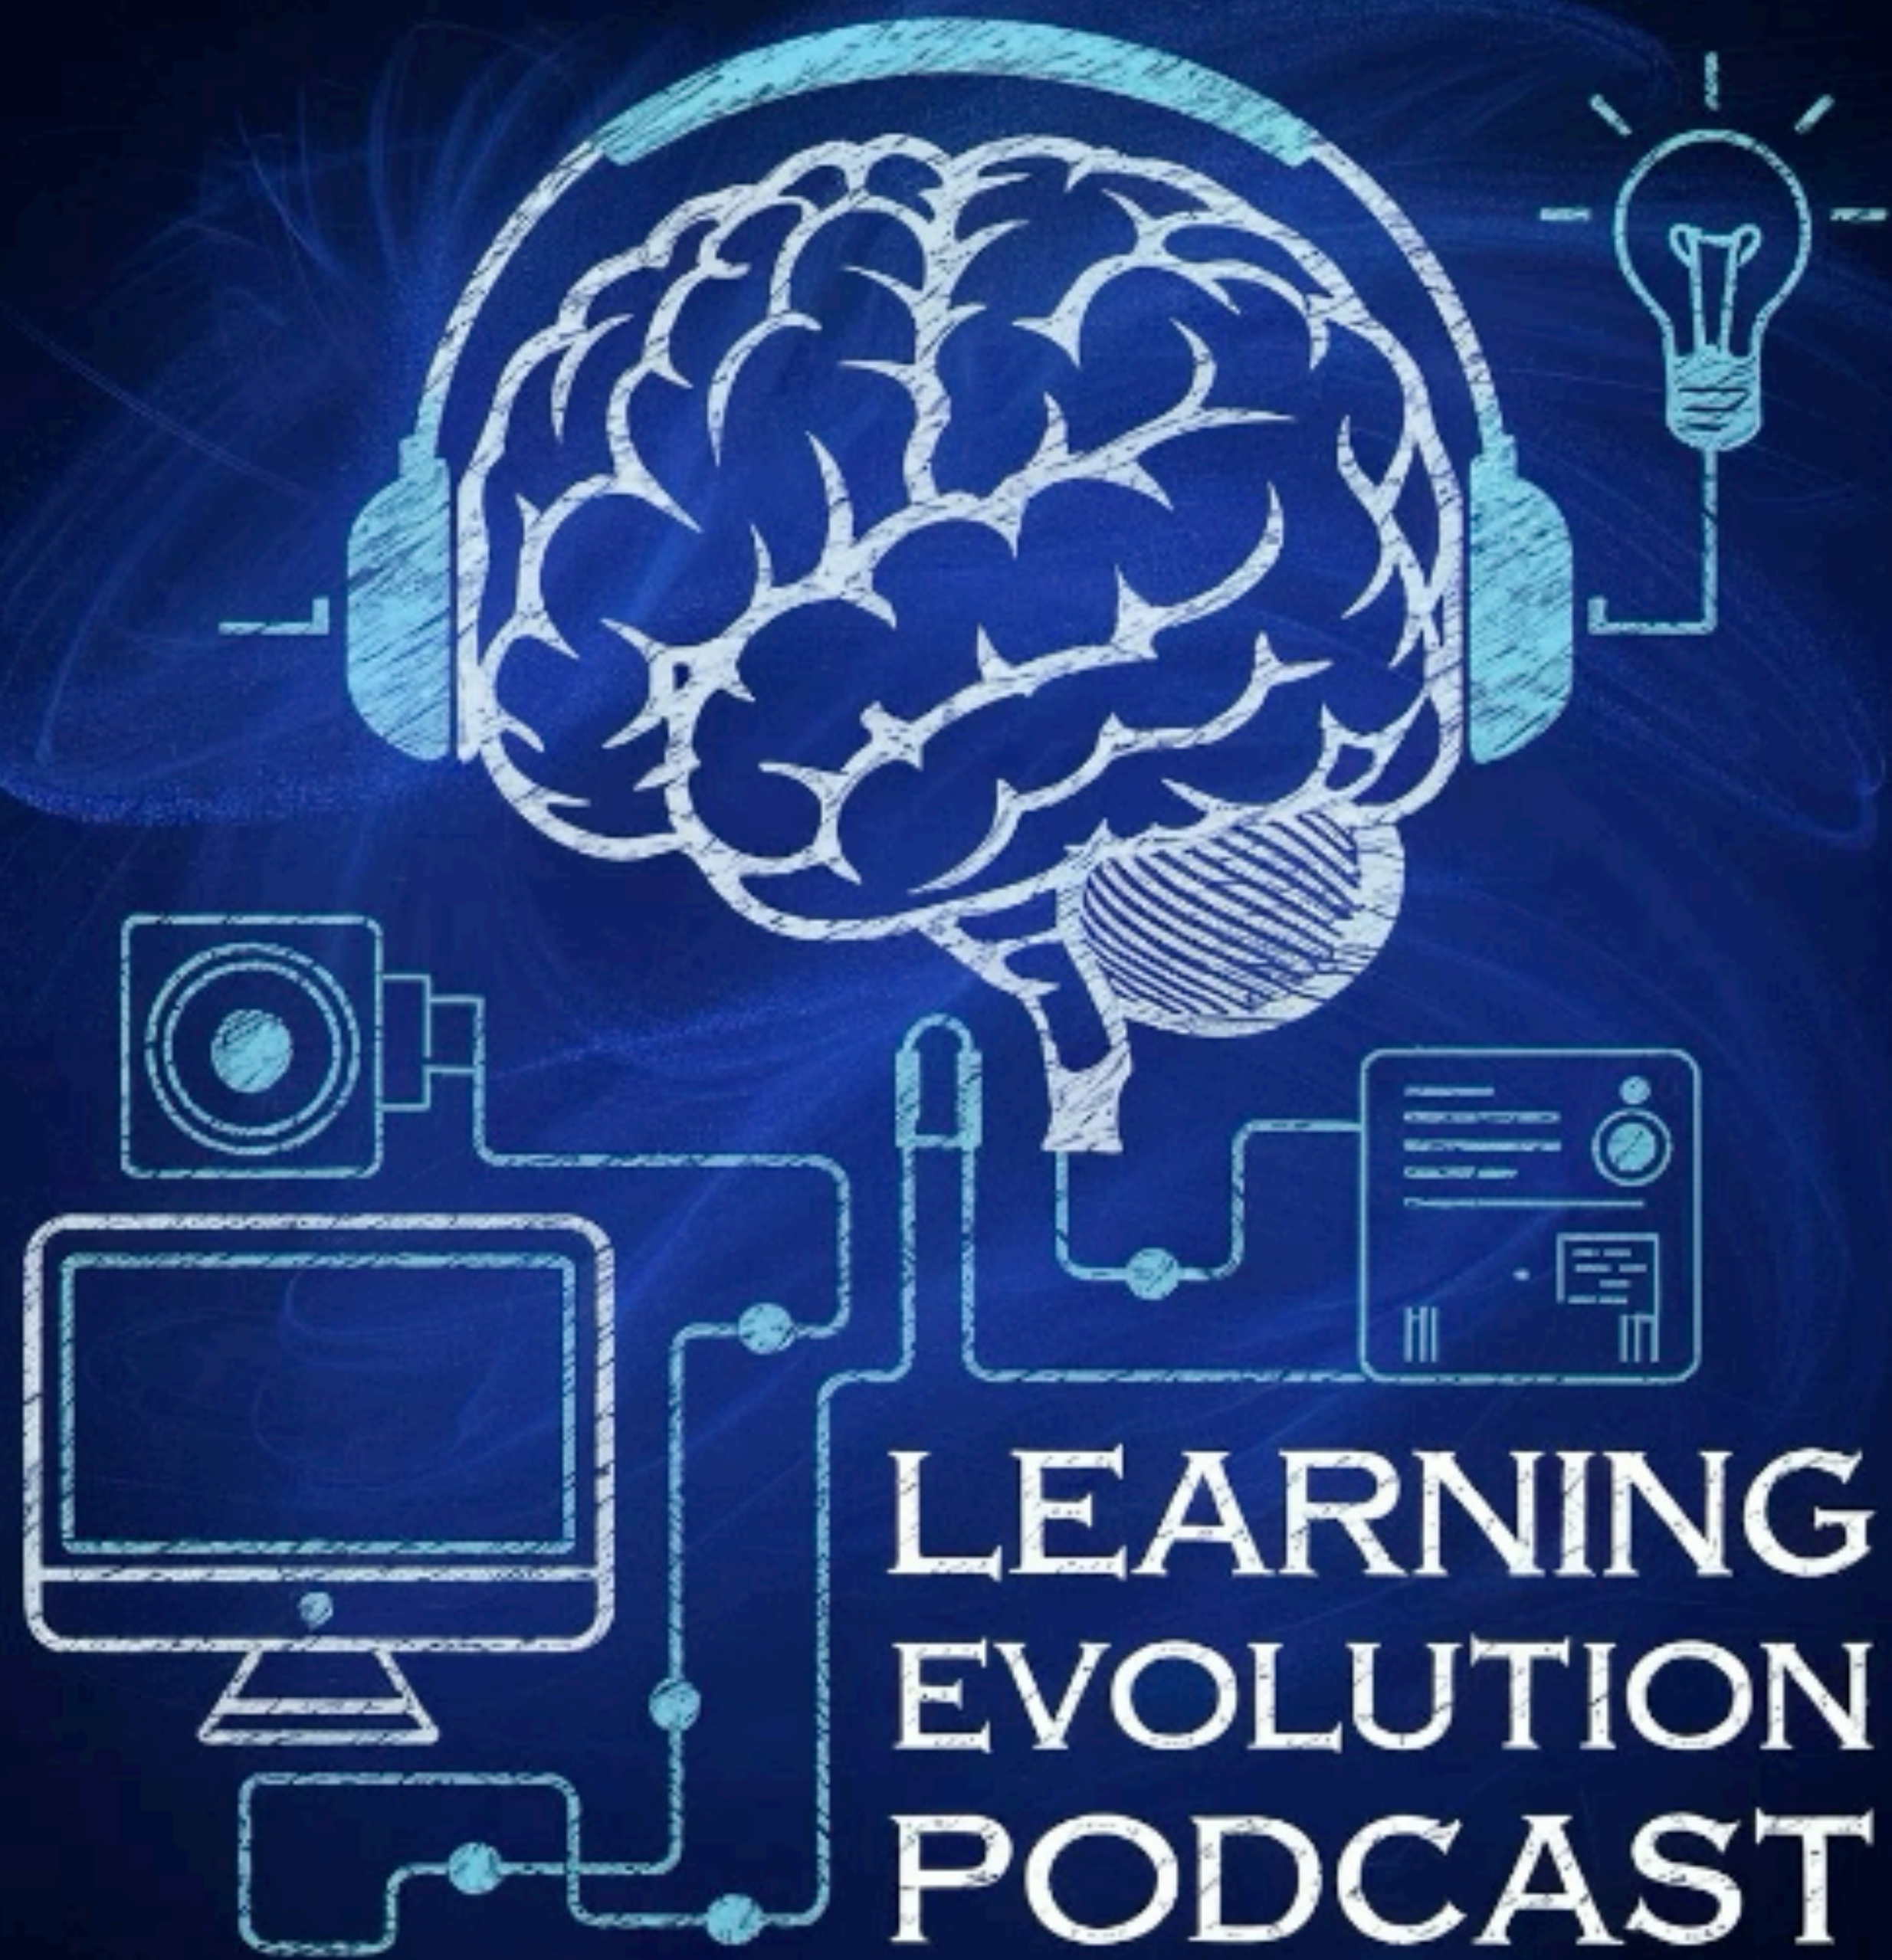

1 source

The text provides excerpts from a book exploring the intersection of advanced technology and education, beginning with a personal tribute to the author's father, **Ray Hooker**, linking his life to the realization that technology grants "extra" time and opportunity. The central argument posits that generative AI, exemplified by tools like **ChatGPT**, represents an evolutionary shift in the knowledge industry, much like CGI transformed film, necessitating that educators learn to utilize it. The author clarifies that this is not about AI replacing human roles but rather enhancing work by serving as a co-pilot to help educators save time and enable students to foster deeper understanding. A substantial focus is placed on ethical considerations, particularly addressing issues of **AI hallucination** and **embedded bias** within training data, which requires a new emphasis on digital and media literacy. The material concludes with practical guidance, breaking down numerous ways educators and administrators can leverage **Large Language Models (LLMs)** and **AI creativity tools** for everything from drafting emails to designing new, process-focused assessments that resist
