My own Personal Best Trivia

Challenge Part 1:

Find a partner and ask them what their best trivia category would be.

GOSSIP GIRL TRIVIA

3. Which European city do Blair and Chuck get married in?

- A) Paris
- B) Rome
- C) Monte Carlo
- D) New York City

Answer: D) New York City

My own Personal Best Trivia

Challenge Part 2:

Use an **LLM** to create 5 trivia questions with multiple choice answers on the topic and quiz your partner on their topic. If they get the right answer without multiple choice it's 2 points. With multiple choice is 1 point.

Did **AI** get any wrong?

IMAGE GENERATORS

IMAGE GENERATORS

A screenshot of a social media feed titled "KarAIoke Songs" on a purple background. The feed displays 18 AI-generated images arranged in a grid of 6 columns and 3 rows. Each post includes an image, a caption, and interaction buttons like "Add comment" and heart icons. The songs featured are "Another one bites the dust", "Eye of the tiger", "Hallelujah", "A Wild Hunch", "Leaving on a Jet Plane", "Thunderstruck", "Diamonds on the Soles of Her Shoes", "Bridge over Troubled Water", "Little Red Corvette", "Smells Like Teen Spirit", "Hotel California", "Big Yellow Taxi", "Joni!", "Billie Jean", and "Hotel California" (repeated). The images are diverse, ranging from landscapes and animals to people and vehicles. On the right side, there is a vertical toolbar with icons for search, share, download, play, settings, and a plus sign at the bottom. The top left corner shows the user "Carl Hooker + 33 • 6d".

VIBE CODING

VIBE CODING

Design an app/website that is interactive and looks like an old school boom box. The buttons should be interactive and do different things but each time you click on a button, you get a 7th grade math problem to solve. If you get it right, the boom box lights up and plays a song. You can switch out the "tapes" to do other types of problems (geometry, algebra, etc)

Learning Evolution Podcast recap

1 source

The text provides excerpts from a book exploring the intersection of advanced technology and education, beginning with a personal tribute to the author's father, **Ray Hooker**, linking his life to the realization that technology grants "extra" time and opportunity. The central argument posits that generative AI, exemplified by tools like **ChatGPT**, represents an evolutionary shift in the knowledge industry, much like CGI transformed film, necessitating that educators learn to utilize it. The author clarifies that this is not about AI replacing human roles but rather enhancing work by serving as a co-pilot to help educators save time and enable students to foster deeper understanding. A substantial focus is placed on ethical considerations, particularly addressing issues of **AI hallucination** and **embedded bias** within training data, which requires a new emphasis on digital and media literacy. The material concludes with practical guidance, breaking down numerous ways educators and administrators can leverage **Large Language Models (LLMs)** and **AI creativity tools** for everything from drafting emails to designing new, process-focused assessments that resist

What should the AI hosts focus on?

Things to try

- Target a specific use case ("present this to a book club", "help me review for a quiz")
- Focus on a specific source ("show the photos from the album", "focus on the biology paper")
